

bedea Berkenhoff & Drebes GmbH

REACH Declaration

Regulation 1907/2006 of the European Union („REACH, Regulation Concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals“) came into force on June 1st 2007. It forbids manufacturers and importers to put any substance on the European market unless it has been registered with the European Chemicals Agency (ECHA).

Companies processing substances and mixtures they purchased from the manufacturer or importer are called “Downstream Users”. They are obliged to pass on all information that may be needed for the safe use of the substances. Particularly Downstream Users have to inform their customers in case the product sold contains any Substances of Very High Concern (SVHC).

bedea Berkenhoff & Drebes GmbH is a Downstream User as defined by REACH. We aim to keep our products SVHC-free. Therefore we permanently keep an eye on the updates of ECHA’s “Candidate List” containing these substances. We are constantly evaluating our products and taking measures to replace substances as needed.

For detailed information, please visit the ECHA homepage.
